William's feedback for Jamie

-I like the color scheme of B more
-but I like the visual concept of A more and feel like a more bland color palette wouldn't help avoid visual overload
-if possible it'd might be better if the white background was removed from the characters
-I like the smaller versions of the characters head but I would change the selected color since it's hard to see
-then also on A I would add back arrows for switching characters(bottom right of the third page)
